## Program Spotlight

### Off-Sale Alcohol Inspection Program

Jamie L. Matthews, Administrator  
Code Enforcement Division

On February 7, 2006, the San José City Council adopted an ordinance and inspection program for all businesses selling alcoholic beverages for off-site consumption. The intent of the ordinance was to pro-actively inspect businesses that are licensed for off-sale by the State of California Bureau of Alcohol Beverage Control (ABC) to address property maintenance and operational issues that may create a nuisance for neighborhoods.

Although alcohol specific issues will continue to be regulated by the ABC, this program strengthens our partnership and provides a powerful new tool to address neighborhood concerns.

The program is funded by the business through an annual fee. Pro-active inspections began in June. There are approximately 500 establishments in the program and Code Enforcement has coordinated with the Police Department to identify sites that should be prioritized.

Our primary goal is to work with these establishments to bring them into compliance with the ordinance standards and to respond to community concerns.

If you have an Off-Sale Alcohol establishment that you think should be placed at the top of the list, please contact me via e-mail to at [jamie.matthews@sanjoseca.gov](mailto:jamie.matthews@sanjoseca.gov) or by phone at 277-8455.
